

I can't seem to concentrate anymore. It takes me so long to do even the simplest thing.

How do I know if I have
a vestibular disorder?

How do I find an informed doctor?

My children think I'm dizzy because I'm getting older—but it is more than that.

My friends and family just don't get what I'm going through. I feel so alone.

Thanks, VEDA! You helped me learn how to live an active and productive life with a vestibular disorder. How can I help others?
